 XXL Acoustic Frames with Light Path Integration
 Architect: Avner Sher architects - Installation: ART COVER

Shopping Centre - South Korea
 White acoustic ceiling - Installation: EFAS

Shop - BELGIUM
 Printed wall - Installation: MonaVisa

CLIPSO® EXPERIENCE

"CLIPSO® covered partitions were the perfect answer to the specifications that a company sent me. The perfect combination of visuals and layout.

The printed fabric clipped to frames can be changed with the brand's collections, as so can the removable partitions that divide the different spaces.

The parent company liked the concept so much that I was asked to deploy it in all its shops worldwide."

Shop - Germany

Fixed curved cabinet. 140 mm thick. Printed covering.

Sales area - FRANCE

XXL acoustic frame with light integration and hood
 Installation: KALLISTE

CLIPSO® EXPERIENCE

"An optician's shop wanted a change of look". In such a setting, the arrangement and choice of colours are very important.

The closure during the work involved a shortfall that the owner had anticipated. We were therefore keen to meet the deadline. The rapid installation of the CLIPSO® covering and the back-lighting system made it possible to illuminate the space, which is essential for the activity of the shop. And all this in a very short time. We made someone very happy!"

Optical shop - LUXEMBOURG

White ceiling and backlit frames Baumann Spannendecken GmbH

CLIPSO® EXPERIENCE

"The shopping centre, called a cathedral because of its impressive volumes, was a real architectural challenge.

Fortunately, CLIPSO® wide covers not only created a unique specific environment through a play of colours depending on the floor, but also softened the acoustics.

My mission as an architect was to combine aesthetics and technology while "covering" the lighting and fire systems of "this city within the city".

"Globus Max" Shopping Mall - ISRAEL
"Terracotta"-colour 3D effect acoustic ceiling Art Cover

Ready-to-Wear Store - PORTUGAL
