Palais des Festivals of Cannes - FRANCE
Acoustic ceiling white - Installation: Prestations BTP

...for the advantages of CLIPSO®
for walls and ceilings in
Public spaces

1. Wide covers
2. Acoustics
3. Lighting
4. Rapid implementation
5. Standards

CLIPSO® EXPERIENCE

Radio Flyer Corp. HQ - Chicago, IL - USA
Frame - Sky printed canvas, backlit
Installation : The Huff Company, Inc.

"From the acoustic tests - which worried us enormously - we immediately perceived how the overall acoustics of the Palace was improved. So much so that the other artists exhibiting here have asked us since: "Could we take advantage of this? We appreciate it very much..." In addition to the rest (beauty, reference, poetry), it has a real use."

"We're very satisfied. I think this development has been a source of many benefits and surprises. I received today the first exhibition visitors. They were all changed inside. By which I mean, they felt that a modification of the architecture resonated with their inner selves. We're totally satisfied. And the kindness of the team, I insist, was great!"

Jean De Loisy - Director of the Palais de Tokyo

Anywhere, Anywhere Out of The World exhibition at the Palais de Tokyo - Paris - FRANCE - Suspended acoustic ceilings
Artist: Philippe Parreno - Installation : CLIPSO

CLIPSO® EXPERIENCE

"Providing comfort for both library users and librarians was our challenge. It is indeed a studious and demanding audience that seeks peace and quiet.

We were able to create a clean and low-noise ceiling decoration over a huge surface thanks to the CLIPSO® acoustic covering. The acoustics are the same everywhere and our customer is perfectly satisfied!"

Library - THE UNITED KINGDOM
Acoustic ceiling between beams
Installation : Acoustic GRC

Nice train station - FRANCE - "Straw" colour acoustic walls - Installation: CLIBAT

"The refurbishment of a station generates two major problems: providing users with the continuity of service and working as cleanly as possible. Installing CLIPSO® fabrics was a global solution with the assurance of a very short installation time. At the end of the day, the acoustic decorative print has had quite an impact on customers.

It also enabled us to hide the technical lighting and fire protection elements. The profile system will eventually make it possible to modify the decoration over and over! "

VIP Lounge of Koltsovo Airport- RUSSIA
White acoustic canvas and backlit units
Installation: CLIPSO UNION

Training centre of the French Tennis Federation - Roland Garros - France - Acoustic ceiling
Architect: Marc Mimram - Installation : Haguenier
